SUMMARY

Senior UX Designer with 20+ years across enterprise, mobile, web, and connected products at Ericsson, Ellucian, HP, and healthcare technology. Hands-on practitioner of generative and evaluative user research, Design Thinking, customer journey mapping, usability testing, design systems, accessibility, and mobile-first responsive design. Built and led a 21-person UX organization at Ellucian. Designed data-rich, role-based enterprise workflows — customer lifecycle, status visibility, advanced filters, and exception handling and 20+ years of applied UX/HCI practice. Portfolio at uvwx.me demonstrates research methods, journey maps, flows, prototypes, interaction decisions, and measurable product outcomes.

CORE UX CAPABILITIES

Research & Strategy

Generative & Evaluative User Research · Design Thinking · Customer Journey Mapping · Usability Testing · Heuristic Evaluation · Information Architecture

Interaction & Product Design

User Flows · Wireframes · Interaction Models · Prototyping · Visual Design · Mobile-first UX ·

Design Systems & Delivery

Atomic Design · UX Standards & Design Principles · Scalable Design Practices · WCAG 2.2 AA Accessibility · i18n / i10n · Agile · Stakeholder Presentations · Cross-Functional Collaboration · Dev Handoff

TOOLS

Design & Prototyping. Sketch · Adobe Creative Suite (XD, Illustrator, Photoshop) · UXPin

Research. Qualtrics · Camtasia · Survey design & analysis · UserTesting

Front-end familiarity. HTML · CSS · JavaScript · Responsive web design

AI-augmented prototyping. Claude Code · Cursor · Gemini · ChatGPT · NotebookLM — used to accelerate concept validation, design-to-code handoff, and rapid prototyping.

PROFESSIONAL EXPERIENCE

ERICSSON

March 2019 – December 2025

Senior UX Designer · Athlone, Ireland

ESOA — Ericsson Service Orchestration & Assurance — and the ESO 5G UI migration (YMER → EUISDK) for Tier-1 telecom operators including Telstra, TMO, Optus, and Swisscom.

- Led end-to-end UX from generative stakeholder interviews and evaluative usability testing through customer journey mapping, user flows, wireframes, interaction models, prototypes, and polished UI across multiple GA releases for complex connected enterprise systems.
- Closed **28 UX issues** before GA (**5 critical, 10 major, 13 minor**) through heuristic evaluation across **200 guidelines** and **9 usability categories** with **5 UX experts**; established a **72% heuristic UX baseline** with prioritized improvements.

- Reduced pre-release usability risk by quantifying a **35% baseline task-failure rate** across **20 user-task attempts**; synthesized findings into themes, recommendations, and roadmap-ready GA fixes for hidden UI elements, navigation, error messages, and documentation gaps.
- Validated D&R workflows with Telstra and Optus customer users — achieving **100% completion** across **15 required task attempts** and shipping **12 GA improvements** across navigation, data-rich table usability, role-based status visibility, advanced filters, exception handling, empty-state messaging, and labeled icon actions — patterns directly applicable to retail and consumer-industry workflows.
- Led the ESO 5G UI migration from YMER to EUISDK — applying Design Thinking and iterative usability testing to deliver responsive, accessible UI with measurable usability improvements release-over-release.
- Defined scalable UX standards, design principles, & design-system practices in collaboration with global product, engineering, and research teams across India, Ireland, and Canada. Co-led design reviews, ideation sessions, and customer-facing co-innovation workshops with operator stakeholders — iterating on evidence & feedback to translate research findings into product-decision narratives for PM, engineering, and leadership.
- Introduced AI-augmented prototyping workflows that accelerated design-to-code handoff while maintaining full design-system compliance and human validation.

DIAGNOX

May 2016 – February 2019

User Experience Consultant (Independent) · Bangalore, India · Remote

Healthcare technology startup — mobile-first patient engagement and diagnostic-reporting platforms in a regulated context.

- Designed end-to-end mobile UX for patient onboarding, diagnostic-result analysis, and reporting — applying Design Thinking to streamline journeys for both patients and clinical staff.
- Created branding guidelines, visual identity, and reusable style guide aligned to product and brand standards.
- Conducted stakeholder interviews and competitive analysis to inform information-architecture decisions; delivered wireframes, interactive prototypes, and engineering-ready design specifications.

ELLUCIAN

January 2015 – April 2016

User Experience Manager · Bangalore, India

Built and led the flagship India UX organization supporting Ellucian's global higher-education ERP product divisions.

- Built and led a **21-person UX organization** spanning Research, Analysis, Design, and Development — full-time staff plus contractors across U.S., India, and EMEA.
- Set vision, KPIs, and annual goals for the UX division; embedded WCAG accessibility and i18n as standard practice across the product portfolio.
- Drove cross-geography collaboration with U.S. UX teams — managed resource allocation, design reviews, and stakeholder presentations to ensure delivery success.
- Owned the full management lifecycle: recruitment, performance reviews, mentoring, training, budgeting, escalation handling, and stakeholder alignment.

ELLUCIAN

November 2009 – December 2014

Lead UX Analyst · Bangalore, India

Banner XE — Ellucian's flagship higher-education ERP product. Owned UX vision, feasibility, journey mapping, and end-to-end experience strategy for data-rich enterprise workflows and consumer-facing self-service portals (registration, student lifecycle, transactions) — transferable patterns for retail and consumer-industry applications.

- SME for Internationalization (i18n) — partnered with global localization teams; resolved i18n issues across the product portfolio.
- Established and contributed to Ellucian's company-wide UI Pattern Library and design standards — collaborating with global usability experts to standardize reusable, scalable components.
- Designed mobile-first UI for "Mobile Go" — Ellucian's iOS and Android applications — and responsive portlets for the Luminis Platform 5 student portal.

HEWLETT-PACKARD (HP)

April 2006 – June 2009

Senior Communications Specialist · Usability Lead · Bangalore, India

HP.com Business Support Center — usability evaluation across HP's global web properties.

- Established a usability lab and reporting structure to evaluate and improve product interfaces across HP's global web properties.
- Mentored designers on standards compliance, conducted user research, and resolved UX issues to enhance HP.com's customer experience.

EARLIER EXPERIENCE

Mphasis · StorageTek · EDS Technologies — UI/UX, Communications, and Content roles (2001 – 2006). Detailed history available at [linkedin.com/in/mohanvenkatesh](https://www.linkedin.com/in/mohanvenkatesh).

SELECTED UX PROJECTS (SELF-INITIATED)

uvwx.me · Personal portfolio website

2025 – 26

End-to-end UX, embedded Atomic Design system, four detailed case studies, and accessible (WCAG 2.2 AA) responsive UI. Multi-platform deployment with consistent SEO and performance configuration.

Tools. Figma · HTML / CSS / JavaScript · Cloudflare Pages · AI-augmented coding

Career Intelligence Prototype · Job-discovery and matching exploration

2025 – 26

Self-initiated prototype exploring how LLM-powered tools can support senior professionals in navigating the job market. Surfaces opportunities matching a defined profile, evaluates fit against a baseline résumé, and presents prioritized recommendations through a simple three-tab UI.

Tools. Node.js · AI-augmented coding

EDUCATION

Bachelor of Engineering (B.E.), Mechanical Engineering, University of Mysore

PROFESSIONAL DEVELOPMENT & CREDENTIALS

- Human Factors International (HFI) — Web UI, Mobile UX, and Persuasion Emotion Trust (PET) Design.
- Certified ScrumMaster (CSM), August 2015

AWARDS

- SAPPHIRE GEM, CLEAR SPIRIT (Mobile App Design)
- CUSTOMER TEAM CHAMPION (Process Optimization)

LANGUAGES

English (fluent, professional) · Hindi · Kannada · Tamil
